Diesel Mechanic-Warm Springs, GA

Are you a self-motivated individual, who is detail oriented and enjoys the challenge of solving mechanical problems? Do you have Diesel Mechanic experience? Then we have the job for you! Georgia-Pacific is seeking a safety-oriented individual to join our team as a **Diesel Mechanic** in Warm Springs, GA. This role creates value by troubleshooting, repairing and performing preventive maintenance on facility mobile equipment such as mobile cranes, electric vehicles, scissor and boom lifts. The preventive maintenance performed is critical in preventing breakdowns that could lead to production delays.

Georgia-Pacific in Warm Springs, GA manufactures Plytanium® plywood sheathing which is ideal for residential and light commercial construction and Ply Frame® Panels which is softwood & hardwood veneer used for commercial and residential construction, home remodeling, large DIY projects and upholstered furniture framing. Our facility has been in the community and in operations for forty years. GP employees strive for safety and health excellence while achieving an injury free workplace. To learn more about our Building Products division, visit www.buildgp.com.

A Day In The Life Typically Includes

- Troubleshoot and repair electrical and mechanical problems to maintain mobile equipment
- Clean, lubricate and perform other routine maintenance work on mobile equipment
- Use hand tools, power tools and precision-measuring devices and testing instrumentation to ensure optimal equipment performance
- Manage workload that is driven by mill production needs
- Provide and receive effective written and verbal communication as it pertains to equipment issues
- Assist with other maintenance crafts to support equipment outages
- Adhere to all plant safety and environmental guidelines, policies, and procedures to ensure a safe work environment throughout the plant

What Do You Need? **Basic Qualifications**

- High School diploma or GED
- One or more of the following:

- Associate's Degree in Automotive Technology, Diesel/Heavy Equipment Technology or other mechanical field
- A minimum of two (2) years of experience with heavy off-road diesel equipment, machinery diagnostics, hydraulics, electrical systems (6V-96V), fuel systems (carbureted, propane, injected), brake systems, and basic tire repair
- At least one (1) year of experience conducting preventative and corrective maintenance of mobile equipment
- Experience using a computer to perform the following tasks: email, data entry, and document creation
- Willing and able to obtain certification in two or more of the following trades that may include but is not limited to: industrial maintenance (bearings set-up, opti-laser alignment, pump rebuilds, mounting and un-mounting, or other), welding, carpentry, machining, and/or pipefitting, within the first year of employment
- Willing and able to work any shift, weekends, nights, holidays, overtime, as scheduled
- Willing and able to maintain strict adherence to safety rules and regulations, including wearing safety equipment

What Would Put You Ahead?

Preferred Qualifications:

- Experience with industrial maintenance practices and processes
- Experience in a wood products manufacturing environment
- Experience reading electrical schematics/mechanical drawings
